***Note:** The National Association of Government Archives and Records Administrators (NAGARA) is an organization that has focused primarily on institutional members rather than individual members. The mailing list NAGARA submitted to the A*CENSUS project contained contact information for 680 individuals that were drawn from many sources (e.g., meeting and workshop registrations, conference speakers, vendor lists), not just NAGARA's membership rolls. While 191 individuals indicated that they are NAGARA members, NAGARA staff tells us that there are not that many individual members in the organization. We assume that many of these people work for institutional members of NAGARA. We have not calculated a response rate for NAGARA because its numbers are not equivalent to the membership counts for other organizations.
